

Genesis Floor Proximity LED Exit Die Cast Aluminum Surface or Recessed Mount AC, or Self-Powered Master

NRTL. UL 924

features

- Floor proximity exit signs are designed to meet codes for low level exits placed 6" to 8" above the floor and within 4" of the exit door frame, in addition to the exit sign above the door.
- Uses LED technology that provides cool operation and 100% even illumination without hot spots and shadows.
- LED lamps draw less than 3 watts.
- The floor proximity sign is available as slimline surface mount or recessed. All connecting hardware included. (conduit and wiring supplied by others).
- Tamperproof screws and clear, high impact polycarbonate shield makes sign vandal resistant.
- Master units are constructed of die cast aluminum. Floor proximity unit housing and stencil face, finished in white or black, is rugged steel. If the floor proximity unit has a brushed aluminum finish, the stencil face is aluminum.

operation

- The Floor Proximity signs are wired to a Genesis LED "master" exit mounted above the door.
- Floor Proximity unit can be mounted up to 10 feet away from master sign. This "master" sign will power and control both signs in the AC and emergency mode. (both signs are 120/277 volt for master/floor proximity operation).
